

# Parrett

Windows & Doors

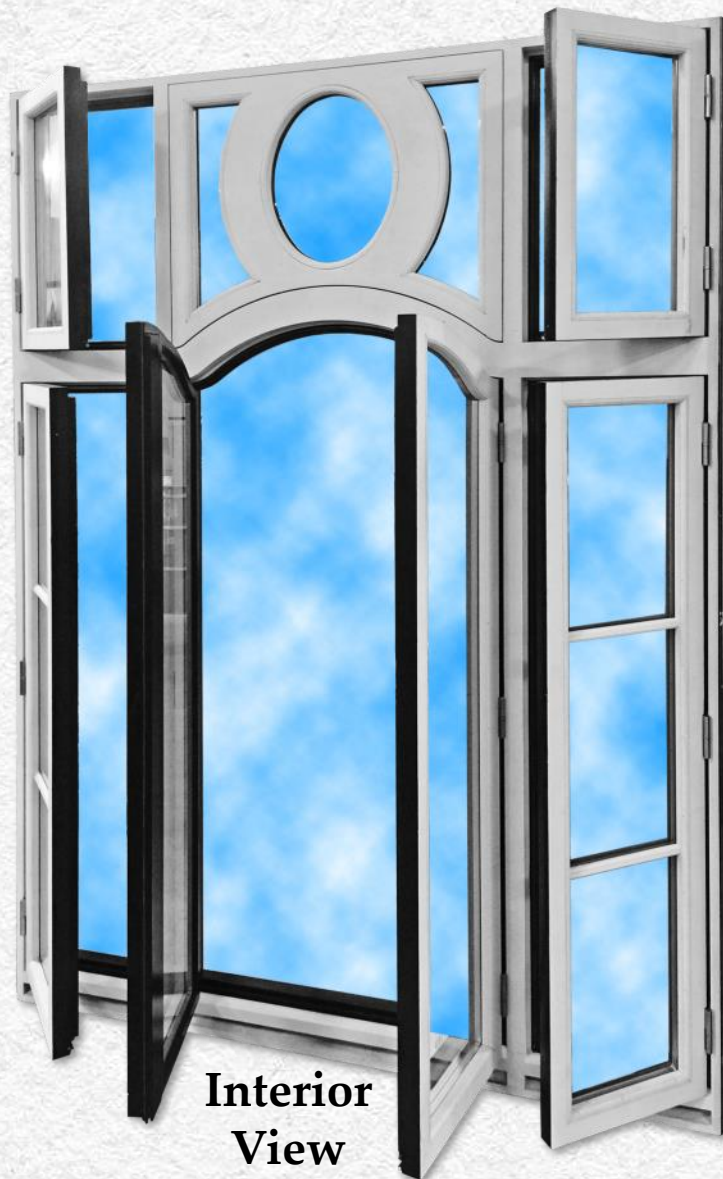

**WINDOW SHOWCASE** VOL. 1

## IN-SWING CASEMENT

- FRENCH TRADITIONAL IN-SWING CASEMENT PROFILE, FACTORY MULLED
- ALL-WOOD CONSTRUCTION
- NYC LANDMARK APPROVED

**Exterior View**

**Interior View**

Parrett's expertise with complicated radius units was integral in replicating the original windows in this project. The center French casement featured a multi-radius top matching the original units.

Custom profiles were also created in order to perfectly replicate the existing unit.

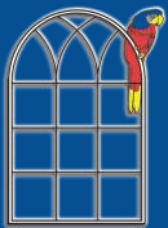

### Window Snapshot

Construction:	Mahogany
Frame Thickness:	1-1/8"
Factory Finishing:	Painted Exterior & Primed Interior

### Hardware Specifications:

**3.5" Lift-Off Hinges** were specified by the customer.

- Satin Nickel Finish
- (3) Hinges per Sash based on Parrett engineering analysis

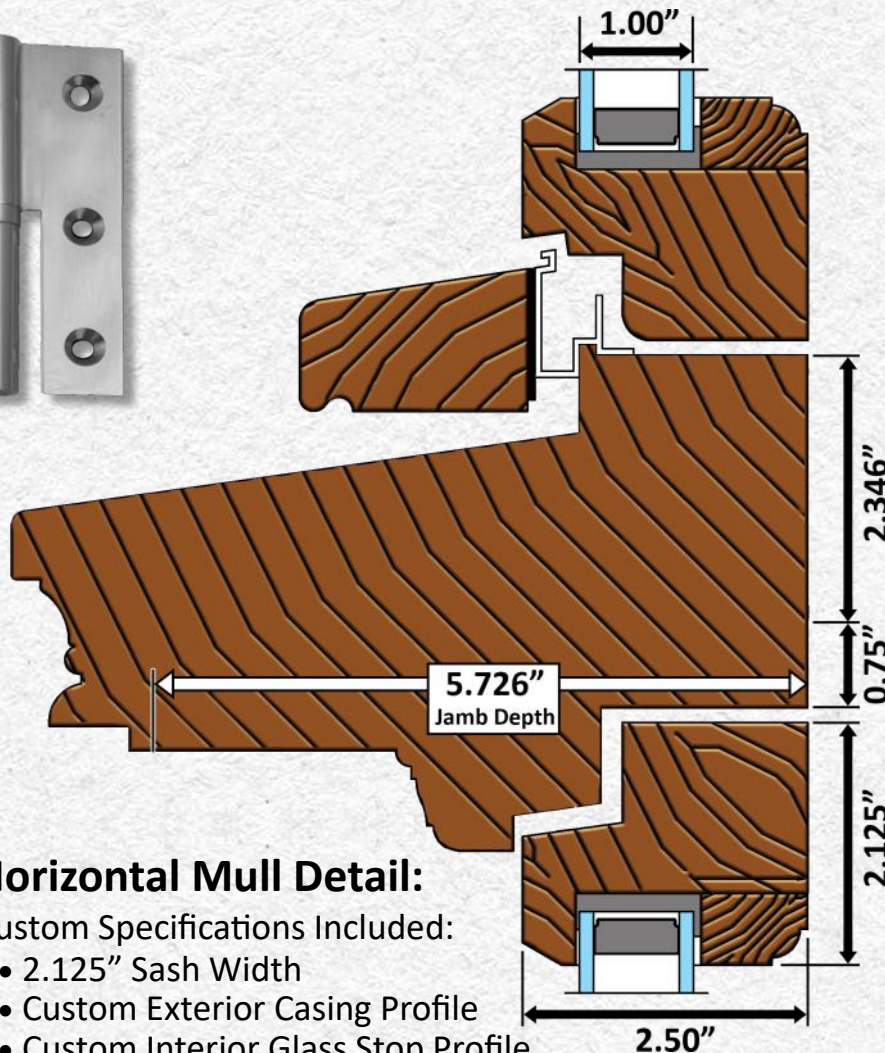

All other operating hardware was supplied in the field. Parrett offers "hardware prep" for units receiving customer provided hardware.

### Unit Dimensioning:

The unique Mediterranean radius top shape of the center unit was determined by analysis of the original window by Parrett's CAD department. The frame and sash each required several splices to achieve this.

Parrett has unrivaled experience in producing operating units of virtually any shape and still providing units with great thermal values and weather sealing performance.

### Horizontal Mull Detail:

Custom Specifications Included:

- 2.125" Sash Width
- Custom Exterior Casing Profile
- Custom Interior Glass Stop Profile
- Custom Subsill Detail
- Weather-stripping Not Shown
