WINDOW SHOWCASE VOL. 4

Curved Hung Window Unit

- CURVED FRAME & SASH
- ANGLED TDL GRILLE BARS
- FLAT GLASS PANES
- WEIGHT & CHAIN CONFIGURATION

Detail of sash featuring angled TDL bar configuration with flat glass.

Sash chain and sash limit device are visible in this checkrail detail view.

Curved operating window units are not available from many manufacturers due to the high level of skill required to manufacture. Parrett has extensive experience with curved operating units, and especially curved hung window units. Commonly these units are specified with *curved* glass, but this unique window featured flat glass that utilized vertical true-divided lite grilles that were angled to allow the glass to follow the radius of the curved hung window frame/sash. Horizontal simulated-divided-lite bars were also utilized. Parrett can build curved units to a standard radius or also follow construction templates.

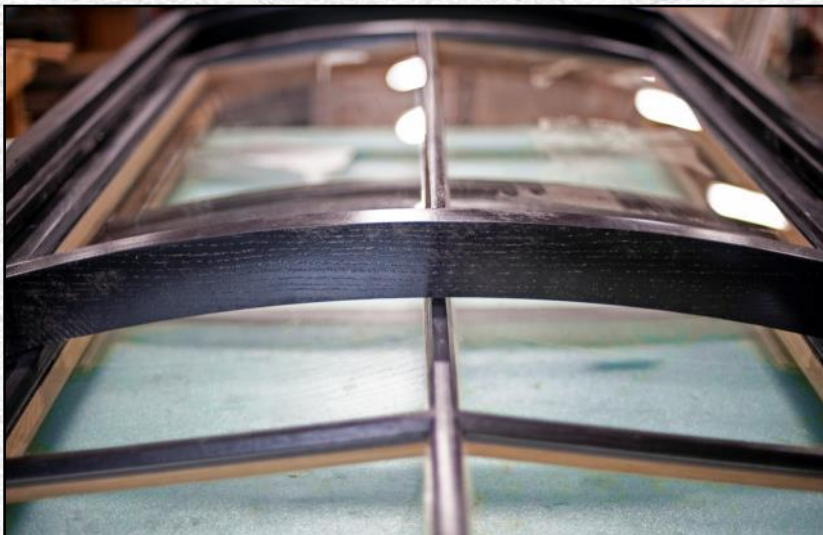

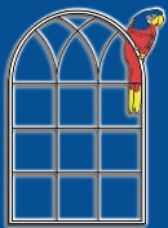

Double Hung Window Snapshot

- Construction: White Oak
- Frame Thickness: 1-1/8"
- Factory Finishing: Fine Paints of Europe
