## DOOR SHOWCASE VOL. 4

### Craftsman Style Entry Door with Dentil Moulding

- RECESSED PANELS & FULL GLASS SIDELITE
- MULTIPOINT LOCKING DOOR HARDWARE
- MAHOGANY - STAINED & CLEAR COATED
- LOW E OBSCURE PATTERN RAINGLASS

This beautiful replacement door with sidelite greatly enhanced the overall beauty of this home's entryway. This door system was constructed of mahogany lumber and was factory stain and clear coated to accentuate the beauty of the wood. Custom design specifications included three recessed wood panels and a unique dentil moulding. Dentils are historically associated with Classical (Greek & Roman) and Neoclassical (Greek Revival) architectural styles.

A rustic umber finished multipoint locking handleset provided a stylish yet secure locking method which was paired with matching finish adjustable hinges.

Low E glass featuring a privacy enhancing "rainglass" pattern on the #4 surface was also customer specified with the intent to still allow light to pass through the door while providing an increased level of privacy. Simulated divided lite grilles were also applied to the exterior and interior of this glass piece.
