Built to Your Specification

About Parrett

Parrett builds quality products to your specification. We do have standard profiles and designs but also pride ourselves in our ability to efficiently take your specification and produce a high quality, high performance product. Every Window and door is individually engineered and constructed with a high level of care and quality. Size, shape, style and profiles are all part of the carefully considered design to meet your specific order requirements.

Our employees take a tremendous amount of pride in our work. It starts with a knowledgeable and very experienced staff of sales engineers providing you with an efficient quote and order process. Once the order is released to production, Parrett will begin by using a solid foundation for building our products. We use the best materials, incorporate quality design and then follow it up with superb craftsmanship using modern equipment to compliment our skilled workers craft.

Our size and extensive capabilities allow us to produce your order very efficiently. When your beautiful products are complete we make every effort to deliver on our own fleet of delivery trucks - Parrot Express. This ensures safe, efficient and economical delivery to your door.

Windows

Don't settle for average when you can have the best value with Parrett's finely crafted windows. Our quality windows are available in all wood and aluminum clad wood. For lasting beauty and satisfaction Parrett will build your window to the style and character you desire.

Doors

To compliment our beautiful windows Parrett offers distinctive interior and exterior wood doors in a variety of shapes and styles. Choose from numerous raised panel options, door lights with glass panels of your choice or custom features that meet your dreams.

Accessories

Trims, casings, mouldings, grilles and other accessories for the interior or exterior can be made to match your windows and doors in style and character. The same high quality and standards you have come to expect from Parrett are used to make the wide array of accessories available.

Services

Parrett has dedicated customer service representatives ready and willing to assist you with any post sales issue that may arise. Whether you would like a production update, a delivery schedule, provide us with special delivery instructions or to address our comprehensive warranty; a knowledgeable representative is always there to serve your needs.

Quality You Can Count On

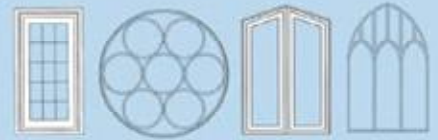

Outstanding Value

Built to Last

Choosing products that are the most durable and energy-efficient for your project is one of the most important aspects. That's why at Parrett Windows & Doors, we make every effort to provide high quality specialty windows, doors, grilles, and mouldings in an environmentally conscientious manner. Along with our glass qualifying for Energy Star status **we are also FSC Certified** for numerous lumber species if **LEED points** are required.

INNOVATION AND DESIGN

Our products are designed to achieve the best possible energy performance while being exceptionally durable and requiring little maintenance. Not only does Parrett work hard to provide optimal energy performance, but we also pay close attention to the recycling and environmental issues that occur in the manufacturing process.

MATERIALS AND RESOURCES

Recycling is a very important part of our society and Parrett has taken responsible measures to make sure we are doing our part. Many of the materials that we use are recycled or reused. Not only do we recycle materials, but many scrap parts are used as raw materials by others, including our glass, wood, aluminum, and vinyl.

- | | | |
|---------------------|-------------------|---------------------|
| • Aluminum | • Glass Bottles | • Sawdust and Chips |
| • Antifreeze | • Hazardous Waste | • Scrap Metal |
| • Batteries | • Heavy Cardboard | • Shrink Wrap |
| • Cardboard | • Metal | • Steel Banding |
| • Cardboard Barrels | • Metal Drums | • Tires |

| • Copper | • Paper | • Window Glass |
| • Electric Waste | • Plastic | • Wood Pallets |
| • Fluorescent Bulbs | • Plastic Bottles | • Wood Scraps |
| • Freon | • Pop Cans | |

Parrett has taken many steps to associate ourselves with suppliers who are environmentally conscious as well. Most of our components are sourced within 500 miles of our manufacturing facilities in Dorchester and Stetsonville, WI. The bulk of the lumber used in our wood products comes from managed forests, and some of the mills that provide for us are certified by the Sustainable Forest Initiative (SFI) or the Forest Stewardship Council (FSC).

At Parrett we believe it is important that we are always environmentally conscientious not only for the sake of our customers, but for our employees, family members and our planet. We want to make sure the people around us have the opportunity to enjoy our beautiful natural resources for many generations to come.

ENERGY PERFORMANCE

Parrett energy-efficient windows and doors meet and exceed the requirements set forth by ENERGY STAR. Meeting ENERGY STAR requirements is an important part of achieving LEED-H certification and for other green building rating systems as well. Energy efficient products reduce the amount of solar heat, by doing so your project will be able to reduce the size of air conditioning units to maintain cooler temperatures.

- Radius and non radius shapes
- Arch top and half circle shapes
- Aluminum or wood screens
- Numerous hardware options
 - Multi-Point
 - Pushbar
 - Crank-Out
 - Friction Stay
- Flush overlap sash design
- Triple pane glass
- Interior & exterior factory finishing

Design Options:

Our primary goal is to provide you with the *best value in today's quality specialty window market*. Choose from Out-Swing or In-Swing with options for pushbar and rotar handles as well as multi-point locking systems.

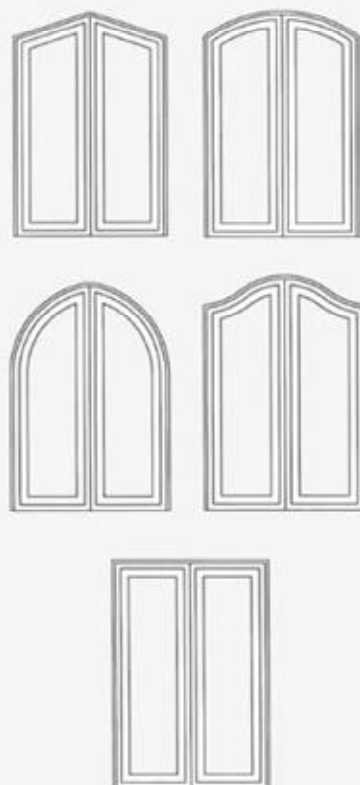

French Casements

Options:

- In-Swing or Out-Swing
- All Wood or Aluminum Clad
- Out-Swing standard hardware is crank out operators and single point locking system
- Pushbars with or without Friction Stays for out-swing casements
- In-Swing standard hardware is a multi-point locking system
- Triple pane glass
- Interior & exterior factory finishing

French style also provides for multi-point or flush bolt locking using a variety of elegant, traditional operating hardware. Push bar, cremone bolt and stylish crank handles will *create a look of distinction.*

Design Options:

Euro Style Tilt-Turn

Options:

- European Styling
- Tilt-Turn, Turn Only or French Casement with a Turn only on Semi-Active Sash
- Multi-Opening Positions
- Multi-Functional Locking Points
- All Wood or Aluminum Clad
- Numerous Hardware Finishes
- Aluminum or Wood Screens
- Friction Stays
- Child Safety Locks
- Triple pane glass
- Interior & exterior factory finishing
- Radius Top Shapes

Choose between having your window wide open or simply create a small draft. Parrett's high performance Tilt - Turn provides European styling, high quality craftsmanship, and exceptional value. You'll be amazed by the *engineering and great functionality* of this beautiful window. If you are looking for a distinctive window that performs at the highest level, this is a window you will want to consider. View the best at Parrett Windows & Doors.

Awnings & Hoppers

Options:

- All Wood or Aluminum Clad
- Awning standard hardware is a Encore operator and two lock systems
- Hopper hardware available in single or multi-point locking hardware
- Triple pane glass
- Interior and exterior factory finishing

Traditional operating hopper and awning windows provide a *unique look and ventilation flow*. Use Parrett awning and hopper windows to ventilate your home or add architectural design. Awnings are designed to swing out from the bottom to let air and sunlight in, but keep rain out. Hopper windows swing in from the top to provide easy cleaning and good room ventilation. Remove the hot air from a room's upper air space with our functional hopper and awning windows.

Rotating Awning

Options:

- All Wood or Aluminum Clad
- Multi-Opening Positions
- Numerous Hardware Finishes
- Aluminum or Wood Screens
- Triple pane glass
- Interior & exterior factory finishing

Parrett's Rotating Awning design and construction allow the sash to rotate a full 180 degrees for easy ventilation and cleaning. The high performance hinge system creates *smooth operation, outstanding weather performance, and increased security.*

Pivot Circle | Oval | Rectangle

Options:

- Circle standard hardware is a multi-point locking system with pivot hinges
- Oval standard hardware is a two lock system with pivot hinges
- Triple pane glass
- Interior & exterior factory finishing

Parrett's Rectangular Vertical Pivot, Pivot Circle, and Pivot Oval windows are *second to none in quality and craftsmanship*. These windows feature a European style sash along with Old World Craftsmanship. Check out the variety of features and let us custom build one for you.

Bi-Fold Window System

Options:

- Out-Swing or In-Swing Design
- Horizontal or Vertical Roll Screens Available
- Fixed Screens Available on In-Swing
- Up to 8 Panels per Direction
- Up to 16 Panels in an Entire Opening
- Hurricane Glass Available
- Interior and Exterior Use
- Triple pane glass
- Interior & exterior factory finishing

Multiple Roll Screen Options are available on Parrett Bi-Fold Window Systems.

Expand your room indoors or outdoors with ease. Parrett's well engineered Bi-Fold window system not only provides a beautiful design but also great functionality. This window system is ideal for opening one living area to another. Simply release the locks and pull the window panels in the open direction. Quality craftsmanship and hardware will provide *years of beauty and environment.* Two panel to multiple panel systems are available in your choice of wood species.

Ventilate from the bottom or top sash with our beautiful single, double, or triple hung design. *Contemporary or classic designs* will be sure to match the style and era of your home. Attractive classic or modern balance systems and hardware options are available for your choosing.
